

# JOSE ALVARADO

jalvarado.swe@gmail.com // +1(805)424-2927 // Oxnard, CA

## # Profile

- Experienced full-stack software developer and leader in the engineering world!
- Outstanding ability to analyze and solve problems while building systems in a scalable and extensive manner

## # Experience

### Senior Full Stack Engineer | EngineEars

Los Angeles, CA

Jan 2024 - Present

- Create design docs to bring business ideas to development and create a proper work plan for sprints. Owning initiatives throughout the entire cycle from planning to release
- Develop and owned an entire dashboard redesign for two user types that immediately gave us an increase in studio and project bookings. This also contributed to seeing an uptick in DAU and MAU by nearly 60%
- Design and develop multiple api endpoints using Django in order to keep records of our users transactions

### Software Engineer II | PriceSpider

Irvine, CA

May 2021 - Dec 2023

- Designed, built, and maintained APIs. Included user-facing experiences, services, and systems
- Debug production issues across services at multiple levels of the stack
- Conducted research, defined solutions, and authored architectural decisions to improve our pipeline while maintaining backwards compatibility
- Enhanced one of our services in the pipeline by 80% in order to see an increase of successful data when retrieving data from various e-commerce sites

### Software Engineer II | Stock4less

Los Angeles, CA

Jan 2019 - Apr 2021

- Created programs to help automate inventory and create shipping labels using API that reduced work by 15%
- Integrate payment services including Stripe, PayPal, and Affirm
- Designed and built a dashboard for internal tools that would increase team productivity by 30%, built using React.JS, Java, Spring, Maven and Kubernetes
- Authored comprehensive documentation on how end users can use internal tools effectively while also keeping technical documentation for future developers

## # Skills & Interests
